

Badger Basics 1a: Getting to know us

Badgers are **Omnivores**, they eat all different types of food

Can you find out what kind a

Carnivore eats?

Omnivore eats?

These are badger teeth.
Big, aren't they!

Badgers have **incisors**.
They are for nibbling.

Badgers have big **canine teeth**.
They are for tearing food.

They have **molars**.
They are for grinding food

They have **premolars**.
They are for snipping
like scissors.

You have all of these teeth too.

So you are an **omnivore**.
